WA-ZR HDPE Casing Spacers w/ roller wheels

ZR model casing spacers are designed for use on all pipeline materials from 300 to 805 mm diameter.

They are designed to work under heavy loads, 1500 kg (3300 lbs.) the spacer is manufactured from quality high-density polyethylene materials (HDPE), the closing clamp bolts are high strength nylon bolts. WA-ZR are complete non-metallic casing spacer for full cathodic protection.

The support leg rollers facilitate pulling the pipe through the casing with less friction. Units are hook clipped together in the field with the appropriated number of elements to form the casing spacer, the nylon bolts tighten the units around the carrier pipe.

WA-ZR casing spacers are shipped with all components ready to install.

Specifications:
- Leg heights available: 35, 60, 90 mm (1.38", 2.36", 3.54")
- Runner width: 180 mm (7")
- Material of the runner: HDPE
- Lock material: Nylon
- Working temperature:
  -20 °C to +80 °C

Installation:
Place a Spacer 150 mm (6") from each end of the casing
1.5 m (5ft.) centered along the pipe spool
Max static load each spacer: 1500 kg
