

Tapered Plug Seals for Pipe through wall penetrations

Tapered pipe plugs can be used in core drills and wall sleeves. Pressure tight to 3 bar. Materials available, EDPM, Nitrile/NBR, Viton, silicone and firesafe materials.

Tapered pipe plugs are used in the ship building to seal pipe and conduit through welded sleeves. Tapered plugs are installed in these applications on both sides of the sleeve.

Tapered pipe plugs can be used in non metallic walls such as in yacht applications or other type wall barriers.
