

Pipe penetration through Metal or Steel Bulkheads

WA-GP-C sleeves are bolted to a steel structure and sealed with a flange gasket against the bulkhead. The pipe or conduit passing through the sleeve, is sealed with a WA-GP-SR disk-seal.

For ordering provide: Pipe size and wall openings.

- 2" pipe x 4" opening
- 4" pipe x 6" opening
- 6" pipe x 8" opening
- 8" pipe x 10" opening
- Larger openings may be selected

Pipe seals and wall gasket materials:

- EDPM, NBR or Silicone
- Customer will indicate seal material at time of PO.
- Water tight to 36 psi
