

## Casing spacers small diameter multi pipes through same casing

### WABR HDPE Casing Spacer

Multi-Carrier conduit pipe bundle allow multiple carrier pipes to fit into a common casing and ensure separation between the pipes.

WABR HDPE casing spacer pipe holders ensure the correct distance between the pipes and spacer alignment is maintained.

These non-metallic casing spacers are designed for several combinations of smaller carrier pipe bundles.

The pipes may be clustered together and separated by holding units for various combinations.

Please contact us for any proposed cluster of carrier pipes, we will calculate a solution for your particular application.

### Other non-metallic casing spacers for single larger pipes 8" up to 60 inch pipe outside diameters
